

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
DWID	int	(max 19 chars)		A unique integer ID for every individual in U.S.	Catalist Business Rules
STATEFILEID	varchar	(max 40 chars)		The ID from the most recent state voter file if one exists. This may take any format and is not guaranteed unique in any way.	Board of Elections
COUNTYFILEID	varchar	(max 40 chars)		The ID from the most recent county voter file if one exists. This may take any format and is not guaranteed unique in any way.	Board of Elections
HOUSEHOLDID1	int	(max 19 chars)		Household ID that is generated using address.	Catalist Business Rules
HOUSEHOLDID2	int	(max 19 chars)		An alternate household ID that is generated using unique address and last names. More restrictive than the HouseholdID1 which is based upon address only.	Catalist Business Rules
DISTRICTINGISIMPUTED	char	(1)		Indicates whether the districts were assigned from scratch such as for an NCOA or VAP record.	Catalist Business Rules
FIRSTNAME	varchar	(max 50 chars)		Given Name	Voter File
MIDDLENAME	varchar	(max 50 chars)		Middle Name	Voter File
LASTNAME	varchar	(max 50 chars)		Surname	Voter File
NAMESUFFIX	varchar	(max 20 chars)		Name Suffix: JR SR III etc.	Voter File
FULLNAME	varchar	(max 100 chars)		Concatenated form of full name for display.	Catalist Business Rules
BIRTHDATE	char	(10)	[YYYY-mm-DD]	Format is YYYY-mm-DD. May have only year and 00-00 for unknown month/day.	See BirthDateSource
BIRTHDATESOURCE	varchar	(max 10 chars)	("voterFile", "commercial")	Possible values: voterFile = data from state voter file, commercial = imputed value supplied by commercial vendor.	See values

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
AGE	int	(max 19 chars)		Age value is computed from Birthdate. This computation is done every time the data mart is generated, which occurs multiple times per year. It may be desireable to update this field from the BirthDate field on a regular basis or just calculate as needed.	Catalist Business Rules
ELECTIONDAYAGE	int	(max 19 chars)		Age value is computed from the Birthdate as compared to the closest general election.	Catalist Business Rules
GENDER	varchar	(max 7 chars)	("male", "female", "unknown")	Gender represented as: male, female, unknown.	See GenderSource
GENDERSOURCE	varchar	(max 10 chars)	("voterFile", "imputed", "commercial")	Possible values: voterFile = data from state voter file, imputed = gender imputed from name by DW, commercial = imputed value supplied by commercial vendor.	See values
RACE	varchar	(max 14 chars)	("black", "caucasian", "asian", "nativeAmerican", "middleEastern", "hispanic", "other", "unknown")	Possible values: black, caucasian, asian, nativeAmerican, middleEastern, hispanic, jewish, other, unknown. May come from voter file or commercial source.	See RaceSource
RACECONFIDENCE	varchar	(max 20 chars)	("Possibly", "Likely", "HighlyLikely", "Uncoded")	Possible values are: Possibly, Likely, HighlyLikely, Uncoded. When present, these come from a commercial vendor.	Commercial Data

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
ETHNICITY	varchar	(max 50 chars)	("Afghan", "Arab", "Armenian", "AsianIndian", "Bangladeshi", "Bulgarian", "Cambodian", "Chinese", "Colombian", "Croatian", "Cuban", "Danish", "Dominican", "Egyptian", "Filipino", "Greek", "Guatemalan", "Hmong", "Hungarian", "Iranian", "Iraqi", "Israeli", "Italian", "Japanese", "Jewish", "Jordanian", "Korean", "Laotian", "Lebanese", "Mexican", "Nepalese", "Nicaraguan", "Pakistani", "Peruvian", "Polish", "PuertoRican", "Romanian", "Russian", "Salvadoran", "Somali", "Syrian", "Ukrainian", "Unknown", "Vietnamese", "WesternEuropean", "Yugoslavian")	Ethnic subcategory breakdown. This is always supplied by the commercial vendor and is provided as a self explanatory decoded string.	Commercial Data
RELIGION	varchar	(max 50 chars)		Religion imputed from Ethnicity.	Catalist Business Rules
RACESOURCE	varchar	(max 10 chars)	("voterFile", "imputed", "commercial")	Possible values: voterFile = data from state voter file, imputed = race imputed from name and census data by Catalist, commercial = imputed value supplied by vendor Note that currently Catalist is not supplying its own imputed values.	Catalist Business Rules
PARTYAFFILIATION	char	(10)	("CST", "DEM", "DTS", "GRE", "IND", "LIB", "NPA", "OTH", "REF", "REP", "SOC", "SWP", "UNK")	Possible values: CST, DEM, DTS, GRE, IND, LIB, NPA, OTH, REF, REP, SOC, SWP, UNK. Abbreviated name of affiliated party.	Voter File

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
LONGPARTYNAME	varchar	(max 50 chars)		Full name of affiliated party as supplied by Secretary of State or county.	Board of Elections
REGISTRATIONDATE	char	(10)	[YYYY-mm-DD]	The date the selected voter registered to vote on the current file. Always comes from voter file, but may have 00 for day and/or month.	Voter File
EARLIESTREGISTRATIONDATE	char	(10)	[YYYY-mm-DD]	The earliest date for registration seen for this voter. May be earlier than RegistrationDate due to moves and reregistrations.	Voter File
VOTERSTATUS	varchar	(max 19 chars)	("active", "inactive", "dropped", "multipleAppearances", "unregistered", "unmatchedmember")	<p>"inactive" status is only set for people on the current voter file with an inactive value set in that file. See the Release Notes for appropriate state to see official SoS rules on inactive voters.</p> <p>"dropped" indicates that individual has vote history and appeared on past files but does not appear in the most recent Secretary of State voter file.</p> <p>"multipleAppearances" indicates a person with a mailing address in that state, who was sourced from another state file, and who is not found as re-registered for that state. "unregistered" indicates that voter is not on the current or past voter files but is known to reside in the state.</p> <p>"unmatchedmember" indicates a record uploaded by the client that did not match the existing Catalist database.</p>	Voter File, Catalist Business Rules
PHONE	char	(10)		10 Digit phone number	One of: Voter File or Commercial

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
CONNECTIVITYPERCENTILE	int	(max 3 chars)		Model that predicts how likely it is that the phone number is assigned to this individual.	Catalist Business Rules
ASSIGNMENTPERCENTILE	int	(max 3 chars)		Model that predicts how likely it is that the phone number is connected.	Catalist Business Rules
REGADDRLINE1	varchar	(max 150 chars)		Registration Address Line 1	Voter File
REGADDRLINE2	varchar	(max 50 chars)		Registration Address Line 2	Voter File
REGADDRSTREETNUM	varchar	(max 50 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRPREDIRECTIONAL	varchar	(max 20 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRSTREETNAME	varchar	(max 150 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRSTREETTYPE	varchar	(max 20 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRPOSTDIRECTIONAL	varchar	(max 20 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRUNITTYPE	varchar	(max 20 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	USPS processing
REGADDRUNITNUMBER	varchar	(max 50 chars)		Field is a subset of parsed address fields (RegistrationAddressLine) split into component parts.	Voter File

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
REGADDRCITY	varchar	(max 100 chars)		Field is a subset of the CASS parsed address fields (RegistrationAddressLine) split into component parts.	Voter File
REGADDRSTATE	char	(2)		Valid postal abbreviation for state.	Voter File
REGADDRZIP	char	(10)	[dddddd-dddd]	5 digit zip	Voter File
REGADDRZIP4	char	(4)	[dddd]	4 digit zip when known	Voter File
REGADDRSOURCECITY	varchar	(max 100 chars)		The uncorrected source city name from the voter file.	One of: Voter File, COA, or Commercial - See Notes
MAILADDRLINE1	varchar	(max 150 chars)		Mail address is the best known current address for the person. May be one of: mail address from voter file, new address due to change of address, best known address from commercial source. This is always filled in and will simply be the registration address if no other is known.	One of: Voter File, COA, or Commercial - See Notes
MAILADDRLINE2	varchar	(max 100 chars)		Mail address is the best known current address for the person. May be one of: mail address from voter file, new address due to change of address, best known address from commercial source. This is always filled in and will simply be the registration address if no other is known.	One of: Voter File, COA, or Commercial - See Notes
MAILADDRSTREETNUM	varchar	(max 50 chars)		These represent the parsed address and are duplicates to the MailAddressLine fields, just split out.	USPS processing
MAILADDRPREDIRECTIONAL	varchar	(max 20 chars)		A directional found as the first word in the street name and there is no other directional to the left of it.	USPS processing
MAILADDRSTREETNAME	varchar	(max 150 chars)		Primary Street name	USPS processing

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
MAILADDRSTREETTYPE	varchar	(max 20 chars)		The suffix of the address.	USPS processing
MAILADDRPOSTDIRECTIONAL	varchar	(max 20 chars)		A directional word is located to the right of the street name and suffix.	USPS processing
MAILADDRUNITTYPE	varchar	(max 20 chars)		These represent the parsed address and are duplicates to the MailAddressLine fields, just split out.	USPS processing
MAILADDRUNITNUMBER	varchar	(max 150 chars)		These represent the parsed address and are duplicates to the MailAddressLine fields, just split out.	USPS processing
MAILADDRCITY	varchar	(max 100 chars)		Field is a subset of the CASS parsed address fields (MailAddressLine) split into component parts.	USPS processing
MAILADDRSTATE	char	(2)		Valid postal abbreviation for state.	USPS processing
MAILADDRZIP	char	(10)	[dddddd-dddd]	5 digit zip	Voter File
MAILADDRZIP4	char	(4)	[dddd]	4 digit zip when known	Voter File
MAILADDRCOUNTRY	varchar	(max 50 chars)		A "null" value indicates US address.	USPS processing
MAILADDRSOURCECITY	varchar	(max 100 chars)		The uncorrected source city name from the voter file.	USPS processing
NCOAAPPLIED	varchar	(max 20 chars)		Indicates that an NCOA record was applied and can be found in either the registration address of mailing address field. (See next field)	NCOA
NCOAAPPLIEDTOADDRESS	varchar	(max 20 chars)		Indicates which address fields triggered the NCOA record, if any.	NCOA
REGADDRISNCOA	varchar	(max 20 chars)		Indicates if registration address was overwritten by an NCOA.	NCOA
NCOAMOVETYPE	varchar	(max 20 chars)		F = family, I = Individual	NCOA
CHANGEOFADDRESSDATE	varchar	(max 15 chars)	[YYYY-mm-DD]	Date that most recent change of address was recorded for person, if one is known.	NCOA

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
OUTOFSTATEMAILADDRESS	char	(1)		"Y" indicates that mailing address is in a different state than their registration state.	NCOA
FOREIGNMAILADDR	char	(1)		"Y" indicates that mailing address is non-US.	Catalist Business Rules
MOVEDINTOSTATEDATE	varchar	(max 20 chars)	[YYYY-mm-DD]	Date of the NCOA from the former state.	NCOA
STATEMOVEDFROM	varchar	(max 20 chars)		State the person was registered in prior to NCOA process.	USPS processing
LASTPARTYAFFILIATION	varchar	(max 20 chars)		Party affiliation from former state if available.	Catalist Business Rules
REGADDRTYPE	varchar	(max 20 chars)		A non-null value indicates that the registration address is known to be a special type.	USPS processing
USPSREGADDRTYPE	varchar	(max 20 chars)		H = high rise, F = firm, P = PO Box, R = rural route, S = street, G = general delivery	USPS processing
SEASONALREGADDR	char	(1)		"Y" indicates that the registration address was reported as a seasonal address by commercial vendor.	USPS processing
POBOXREGADDR	char	(1)		"Y" indicates that the registration address is a PO Box.	USPS processing
BADREGADDR	char	(1)		"Y" indicates that the registration address is missing city state or zip.	Catalist Business Rules
REGADDRLINEOFTRAVELNUMBER	varchar	(max 10 chars)		USPS LOT number for registration address	USPS processing
REGADDRLOTSORTATIONNUMBER	varchar	(max 10 chars)		USPS LOT sortation number for registration address	USPS processing
REGADDRCARRIERROUTECODE	varchar	(max 10 chars)		USPS carrier route code for registration address	USPS processing

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
REGADDRMAILABILITY	varchar	(max 30 chars)		This field indicates the mailability of the registration address as determined by the CASS processing. Possible values: "Mailable Address", "Probably Deliverable", "Possibly Deliverable", "Probably Undeliverable", "Undeliverable", "Unverified".	USPS processing
REGADDRDPVCONFIRM	varchar	(max 20 chars)		D = Primary number confirmed, secondary # missing; S = Primary Number only confirmed, secondary # present; Y = Address was confirmed; N = Not Confirmed; U = Address not presented to DPV for processing	USPS processing
REGADDRDPVFASTNOTES	varchar	(max 20 chars)		USPS codes for Delivery Point Verification response	USPS processing
REGADDRDELIVERYPOINTCODE	varchar	(max 20 chars)		USPS Delivery Point Code with check character	USPS processing
REGADDRISWALKABLE	char	(1)		Indicates whether registration address is considered "walkable". An address is considered unwalkable if it lacks a city, state, or zip, if it's undeliverable, or if the USPS lists it as a PO Box, General Delivery, a Firm, or a Highrise.	Catalist Business Rules
LATITUDE	float	(max 15 chars)		Applied to registration address, if the registration address is set. If there is no registration address (as in the case of unregistered people), mailing address is used. Null values can occur when no valid address is available.	Geocoding Vendors

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
LONGITUDE	float	(max 15 chars)		Applied to registration address, if the registration address is set. If there is no registration address (as in the case of unregistered people), mailing address is used. Null values can occur when no valid address is available.	Geocoding Vendors
LATLONGTYPE	varchar	(max 20 chars)		In order of accuracy: StreetAddress - Interpolated position along street centerline. PostalExt - This is the Zip + 4 Centroid. StreetName - This is the midpoint of the entire street. SubAdmin - City Polygon Centroid. Postal - The 5 digit Zip Code polygon Centroid.	Geocoding Vendors
CENSUSSTATE	char	(1)		Two digit state fips code associated with Census Geography. Applied to registration address, if the registration address is set. If there is no registration address (as in the case of unregistered people), then mailing address is used. See http://www.census.gov/geo/reference/gtc/gtc_codes.html#fips	Geocoding Vendors
CENSUSCOUNTY	varchar	(max 20 chars)		Three digit County Fips associated with Census Geography. See http://www.census.gov/geo/reference/gtc/gtc_codes.html#fips	Geocoding Vendors
CENSUSTRACT	varchar	(max 20 chars)		Definition: "Census Tract level geographic identifier from the 2010 census geographies." Bennett note: This field is actually useless with census state and census county to accompany it.	Geocoding Vendors

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
CENSUSBLOCKGROUP	varchar	(max 20 chars)		BGs have a valid code range of 0 through 9. Each census tract contains at least one BG, and BGs are uniquely numbered within the census tract. See http://www.census.gov/geo/reference/gtc/gtc_block.html	Geocoding Vendors
CENSUSBLOCK	varchar	(max 20 chars)		Census blocks are numbered uniquely with a three-digit census block number from 000 to 999 within census block group which is nested within census tract, which nest within state and county. See http://www.census.gov/geo/reference/gtc/gtc_block.html	Geocoding Vendors
MAILADDRTYPE	varchar	(max 20 chars)		A non-null value indicates that the mailing address is known to be a special type.	USPS processing
USPSMAILADDRTYPE	varchar	(max 20 chars)		H = high rise, F = firm, P = PO Box, R = rural route, S = street, G = general delivery	USPS processing
SEASONALMAILADDR	char	(1)		"Y" indicates that the mailing address was reported as a seasonal address by commercial vendor.	USPS processing
POBOXMAILADDR	char	(1)		"Y" indicates that the mailing address is a PO Box.	USPS processing
BADMAILADDR	char	(1)		"Y" indicates that the mailing address is missing city state or zip.	Catalist Business Rules
MAILADDRLINEOFTRAVELNUMBER	varchar	(max 10 chars)		USPS LOT number for mailing address	USPS processing
MAILADDRLOTSORTATIONNUMBER	varchar	(max 10 chars)		USPS LOT sortation number for mailing address	USPS processing
MAILADDRCARRIERROUTECODE	varchar	(max 10 chars)		USPS carrier route code for mailing address	USPS processing

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
MAILADDRISDIFFERENT	char	(1)	("Y" , "N")	Y indicates that mailing address is different from registration address	Catalist Business Rules
MAILADDRMAILABILITY	varchar	(max 30 chars)		This field indicates the mailability of the mailing address as determined by the CASS processing. Possible values: "Mailable Address", "Probably Deliverable", "Possibly Deliverable", "Probably Undeliverable", "Undeliverable", "Unverified".	USPS processing
MAILADDRDPVCONFIRM	varchar	(max 20 chars)		D = Primary number confirmed, secondary # missing; S = Primary Number only confirmed, secondary # present; Y = Address was confirmed; N = Not Confirmed; U = Address not presented to DPV for processing	USPS processing
MAILADDRDPVFASTNOTES	varchar	(max 20 chars)		USPS codes for Delivery Point Verification response	USPS processing
MAILADDRDELIVERYPOINTCODE	varchar	(max 20 chars)		USPS Delivery Point Code with check character	USPS processing
MAILADDRLATITUDE	float	(max 15 chars)		Null values can occur when no valid address is available.	Geocoding Vendors
MAILADDRLONGITUDE	float	(max 15 chars)		Null values can occur when no valid address is available.	Geocoding Vendors
MAILADDRLATLONGTYPE	varchar	(max 20 chars)		In order of accuracy: StreetAddress - Interpolated position along street centerline. PostalExt - This is the Zip + 4 Centroid. StreetName - This is the midpoint of the entire street. SubAdmin - City Polygon Centroid. Postal - The 5 digit Zip Code polygon Centroid.	Geocoding Vendors

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
MAILADDRCENSUSSTATE	char	(2)		Two digit state fips code associated with Census Geography. Applied to registration address, if the registration address is set. If there is no registration address (as in the case of unregistered people), then mailing address is used. See http://www.census.gov/geo/reference/gtc/gtc_codes.html#fips	Geocoding Vendors
MAILADDRCENSUSCOUNTY	varchar	(max 20 chars)		Three digit County Fips associated with Census Geography. See http://www.census.gov/geo/reference/gtc/gtc_codes.html#fips	Geocoding Vendors
MAILADDRCENSUSTRACT	varchar	(max 20 chars)		The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number but with leading zeroes and trailing zeroes for census tracts without a suffix. They nest within state and county. See http://www.census.gov/geo/reference/gtc/gtc_ct.html	Geocoding Vendors
MAILADDRCENSUSBLOCKGROUP	varchar	(max 20 chars)		BGs have a valid code range of 0 through 9. Each census tract contains at least one BG, and BGs are uniquely numbered within the census tract. See http://www.census.gov/geo/reference/gtc/gtc_block.html	Geocoding Vendors

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
MAILADDRCENSUSBLOCK	varchar	(max 20 chars)		Census blocks are numbered uniquely with a three-digit census block number from 000 to 999 within census block group which is nested within census tract, which nest within state and county. See http://www.census.gov/geo/reference/gtc/gtc_block.html	Geocoding Vendors
DECEASED	char	(1)		Catalist acquires and combines information on deceased individuals from a variety of official and commercial sources to produce a deceased flag. The deceased flag will be set to "Y" for records Catalist believes are likely to be deceased based on the available information.	Catalist Business Rules
PERMANENTABSENTEEVOTE R	char	(1)	("Y" , "N")	Indicates individual is registered as a permanent absentee voter. State voter file is the source.	Voter File
FIRSTSEENON	varchar	(max 15 chars)		Indicates the first date that the person was seen on a voter file.	Catalist Business Rules
LASTSEENON	varchar	(max 15 chars)	[YYYY-mm-DD]	Indicates the most recent date that the person was seen on a voter file.	Catalist Business Rules
STATE	char	(2)		Valid postal abbreviation for state.	USPS processing
COUNTYFIPS	varchar	(max 3 chars)		Valid 3 digit county fips code. Note that county fips codes are always 3 digits and zero padded.	Catalist Business Rules
COUNTYNAME	varchar	(max 150 chars)		Name of county. Derived from county fips code whenever possible.	Catalist Business Rules
SOSCOUNTYCODE	varchar	(max 150 chars)		County code as supplied by the secretary of state. May or may not be a FIPS code.	Voter File

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
TOWNSHIP	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
PRECINCTCODE	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
PRECINCTNAME	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
UNIQUEPRECINCTCODE	varchar	(max 150 chars)		A field that may be created by Catalist whose construction will vary state by state, but that will be guaranteed unique for each distinct precinct in the state. Refer to release notes for details.	Catalist Business Rules
WARD	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
CONGRESSIONALDISTRICT	char	(2)		Current state house district for voter, as supplied by voter file. When not present on the voter file, this may be imputed from the registration address zip9.	Voter File
STATEHOUSEDISTRICT	varchar	(max 150 chars)		Current state house district for voter, as supplied by voter file. When not present on the voter file, this may be imputed from the registration address zip9.	Voter File
STATESENATEDISTRICT	varchar	(max 150 chars)		Current state house district for voter, as supplied by voter file. When not present on the voter file, this may be imputed from the registration address zip9.	Voter File

Field Name	Data Type	Length	Enum Values / Format	Notes	Source
MUNICIPALDISTRICT	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
COUNTYCOMMISSION	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
SCHOOLBOARD	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
JUDICIALDISTRICT	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
PRECINCTSPLIT	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
CITYCOUNCIL	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
COUNTYLEGISLATIVE	varchar	(max 5 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
SCHOOLDISTRICT	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
SUPERVISORDISTRICT	varchar	(max 150 chars)		Definition, usage and fill rate may vary state by state. Consult appropriate release notes for more information.	Voter File
